- Git

## WORK EXPERIENCE

**Wakeb** 08-2022 - PRESENT  
Backend Developer

- As an accomplished Backend Developer, I've worked on large-scale projects for prestigious companies like Aramco, NCMS, and GAD in Saudi Arabia. My role involved developing robust systems to handle high user traffic, ensuring seamless performance and exceptional user experiences.
- Notably, I contributed to projects incorporating live streaming functionality, enabling real-time interactions and dynamic content delivery to users.

**Osoule** 03-2020 - 05-2021  
Backend Developer

- As a Backend Developer, I played a key role in the company's growth by leading the development of APIs for the release of version two of Our application. I successfully contributed to enhancing the company's offerings and collaborated with the team leader to efficiently manage and prioritize tasks

**Solid Solution** 01-2019 - 03-2020  
Backend Developer

- At this company, I embarked on a journey of API development, working closely with a real team. Through this experience, I had the opportunity to learn extensively about both technical and soft skills, honing my expertise while fostering effective collaboration within the team
